JBS CERTIFICATION MARK PROGRAMME

The general policies of the JBS Certification Mark Programme are as follows:

- The JBS provides certification services for manufacturers participating in the programme and licensed to use the gazetted JBS Certification Marks to indicate conformity with Jamaican Standards.
- Where feasible, programmes will be developed to meet special requirements of the submitter. Where applicable, certification may form the basis for acceptance by inspection authorities responsible for enforcement of regulations.
- In performing its functions in accordance with its policies, JBS will not assume or undertake any responsibility of the manufacturer or any other party.

Participants in the programme should note that in the event of failure to resolve an issue arising from interpretation of requirements, there is a formal appeal procedure.

Further information concerning the details of the JBS Certification Mark Programme may be obtained from the Bureau of Standards, 6 Winchester Road, Kingston 10.

Declared by the Bureau of Standards to be a standard specification pursuant to section 7 of the Standards Act 1969.

First published Month 202X

This standard was circulated in draft form for thirty (30) days non-objection under the reference DJS ASTM F803: 2026.

Jamaican Standards establish requirements in relation to commodities, processes and practices, but do not purport to include all the necessary provisions of a contract.

The attention of those using this specification is called to the necessity of complying with any relevant legislation.

National foreword

This standard is an adoption and is identical to ASTM F803 – 25 Standard Specification for Eye Protectors for Selected Sports published by ASTM International.

Scope of the standard

This specification covers eye protectors, designed for use by players of basketball, baseball, and soccer to minimise or significantly reduce injury to the eye and adnexa due to impact and penetration by baseballs and softballs, basketballs, soccer balls, hands, elbows, and fingers. Protective eyewear offers protection only to the eyes and adnexa and does not protect other parts of the head. Protectors are divided into three types depending on their design characteristics.

This specification applies to eye protectors for use by wearers of corrective lenses and also by those players who do not require prescription eyewear. (**Warning**—Polycarbonate or Trivex spectacle lenses should be used if spectacles are worn under protective eyewear).

In this standard, the use of the words “shall” or “must” indicates a mandatory requirement. The word “should” indicates a recommendation.

Where the words 'International Standard' appear, referring to this standard, they should be read as 'Jamaican Standard'.

Where reference is made to informative and normative annexes the following definitions should be noted:

- Informative Annex – gives additional information intended to assist in the understanding or use of the document. They do not contain requirements.
- Normative Annex – gives provisions additional to those in the body of a document. They contain requirements.

Users should note that all standards undergo revision from time to time and that any reference made herein to any standard implies its latest edition, unless otherwise stated.

This standard is voluntary.

Acknowledgment

Acknowledgement is made to the ASTM International for permission to adopt ASTM F803 – 25.
